

# JAMAICA BAY ACTIVITY BOOK

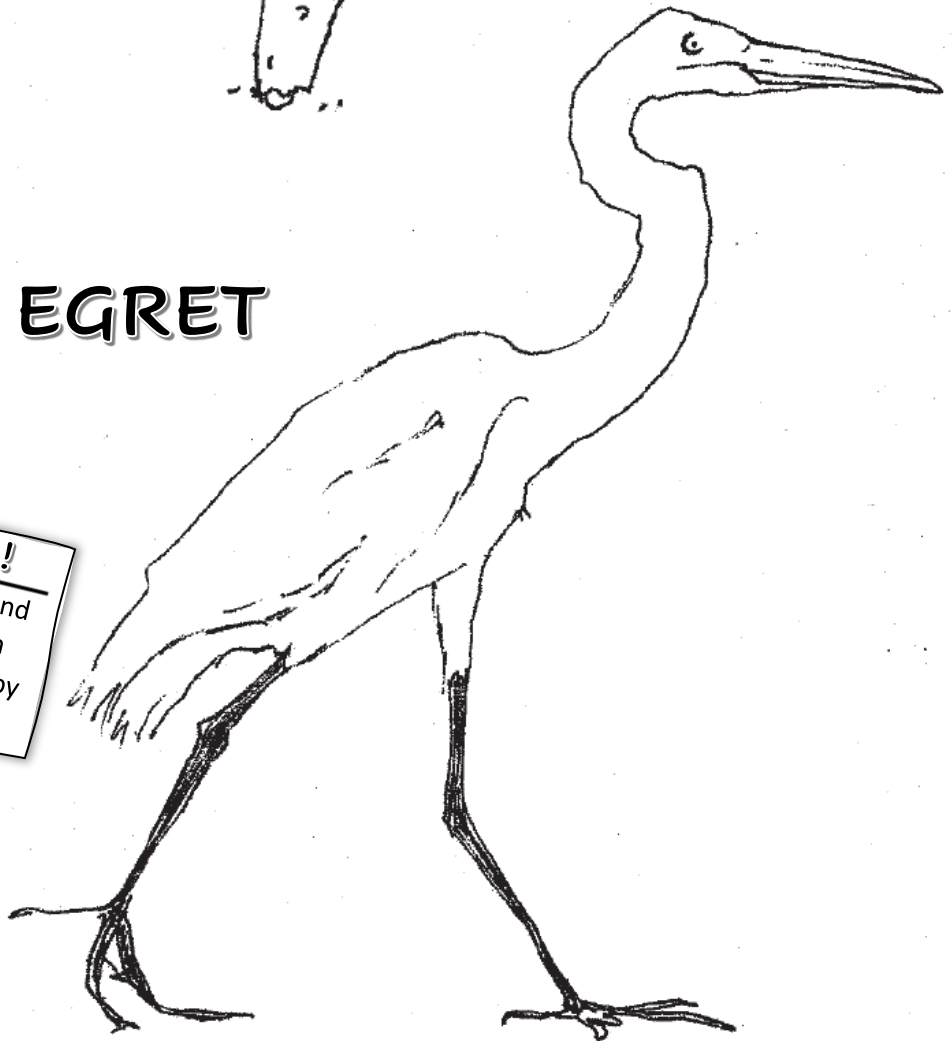

# HERMIT CRAB

## **FUN FACT!**

Hermit crabs will eat almost anything. They help clean Jamaica Bay by eating what most animals will not.

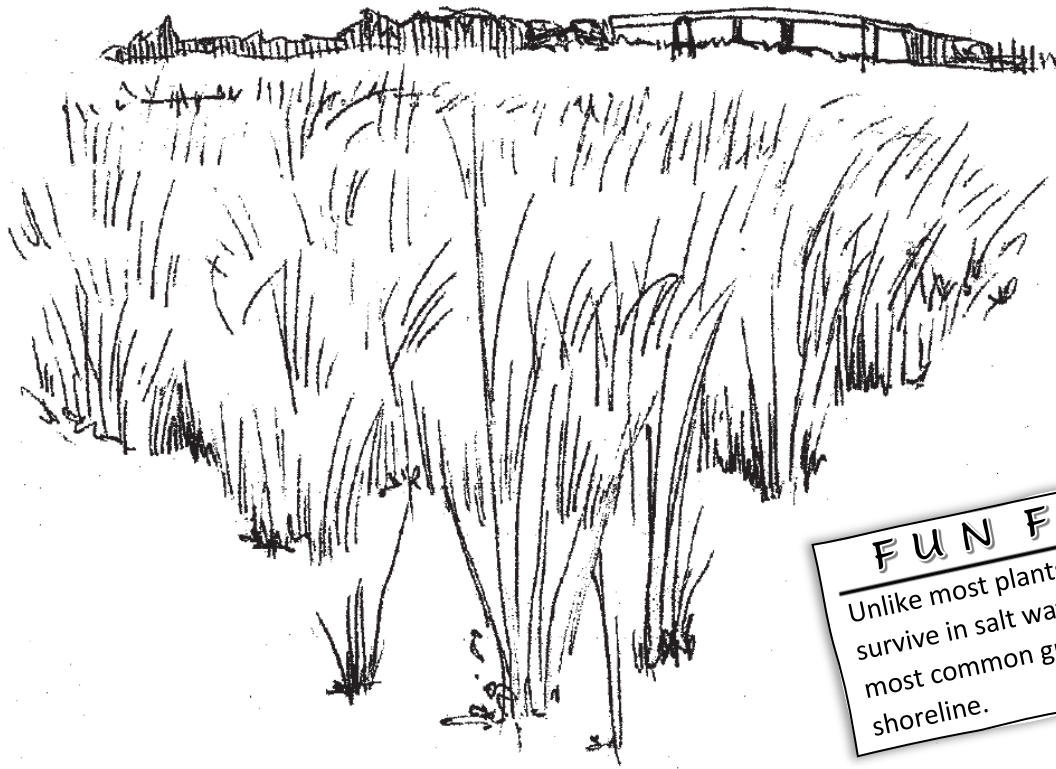

# GREAT EGRET

## **FUN FACT!**

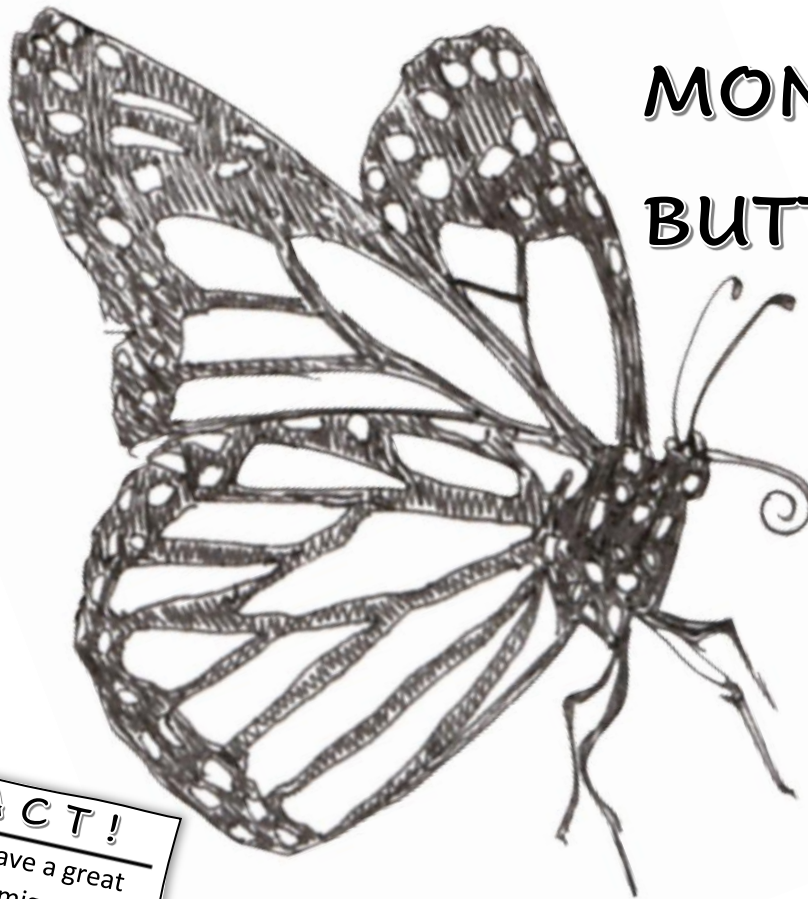

When hunting, an egret can stand perfectly still, camouflaging with the bright sky above, unnoticed by fish swimming below.

# SALT MARSH CORDGRASS

## FUN FACT!

Unlike most plants, cordgrass can survive in salt water and it is the most common grass found on the shoreline.

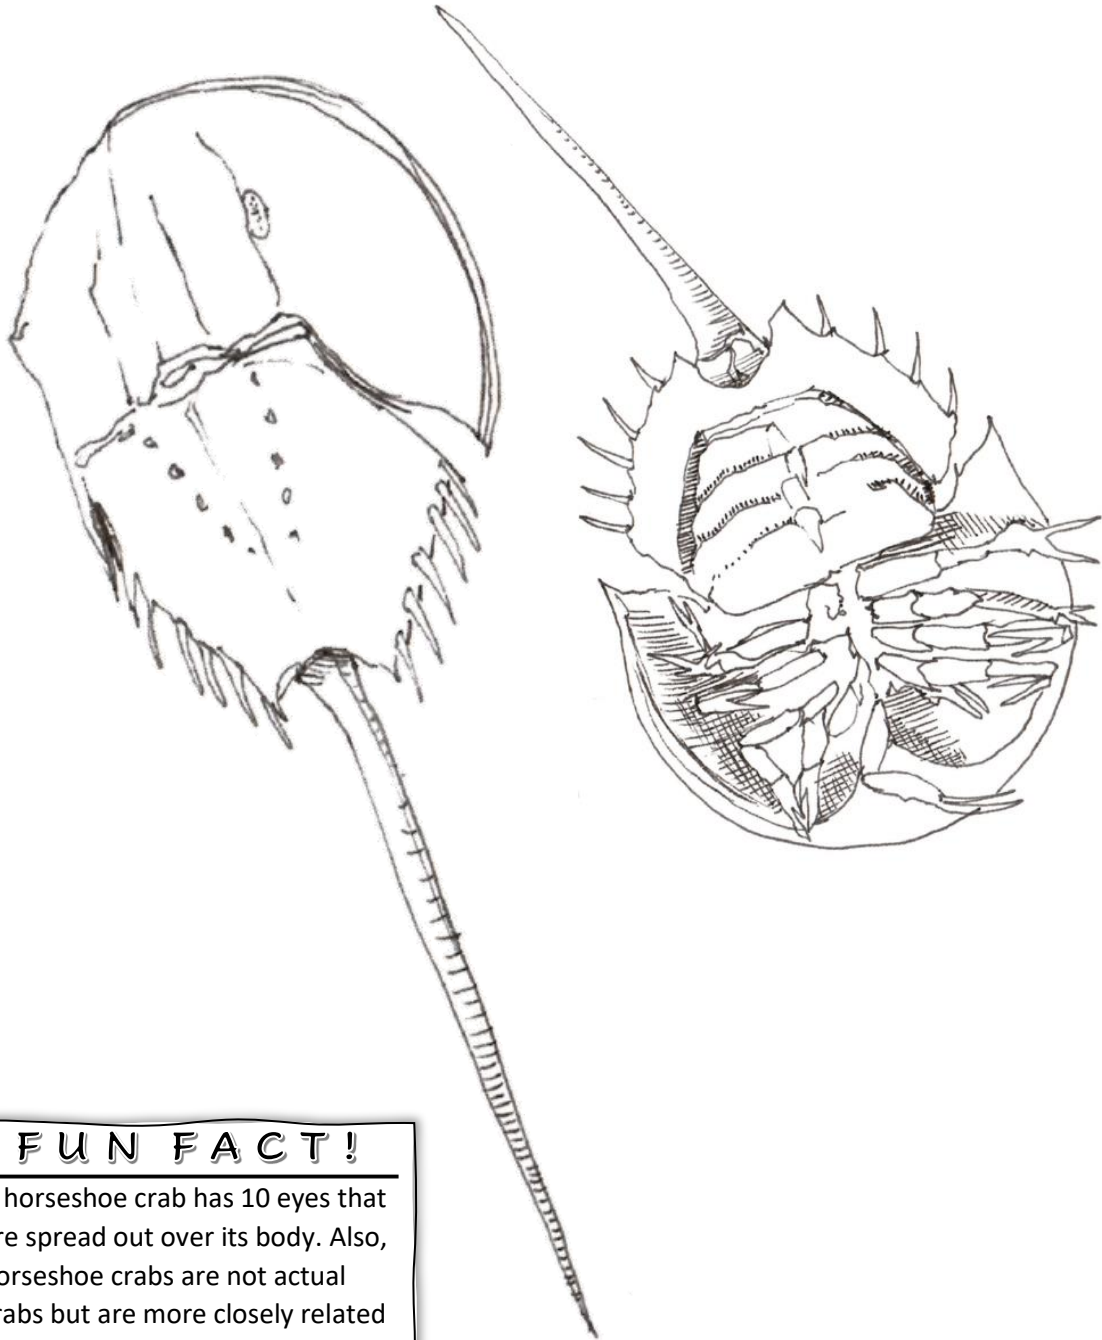

# MONARCH BUTTERFLY

## FUN FACT!

Monarch butterflies have a great sense of direction and migrate thousands of miles to a place they have never seen before.

# HORSESHOE CRAB

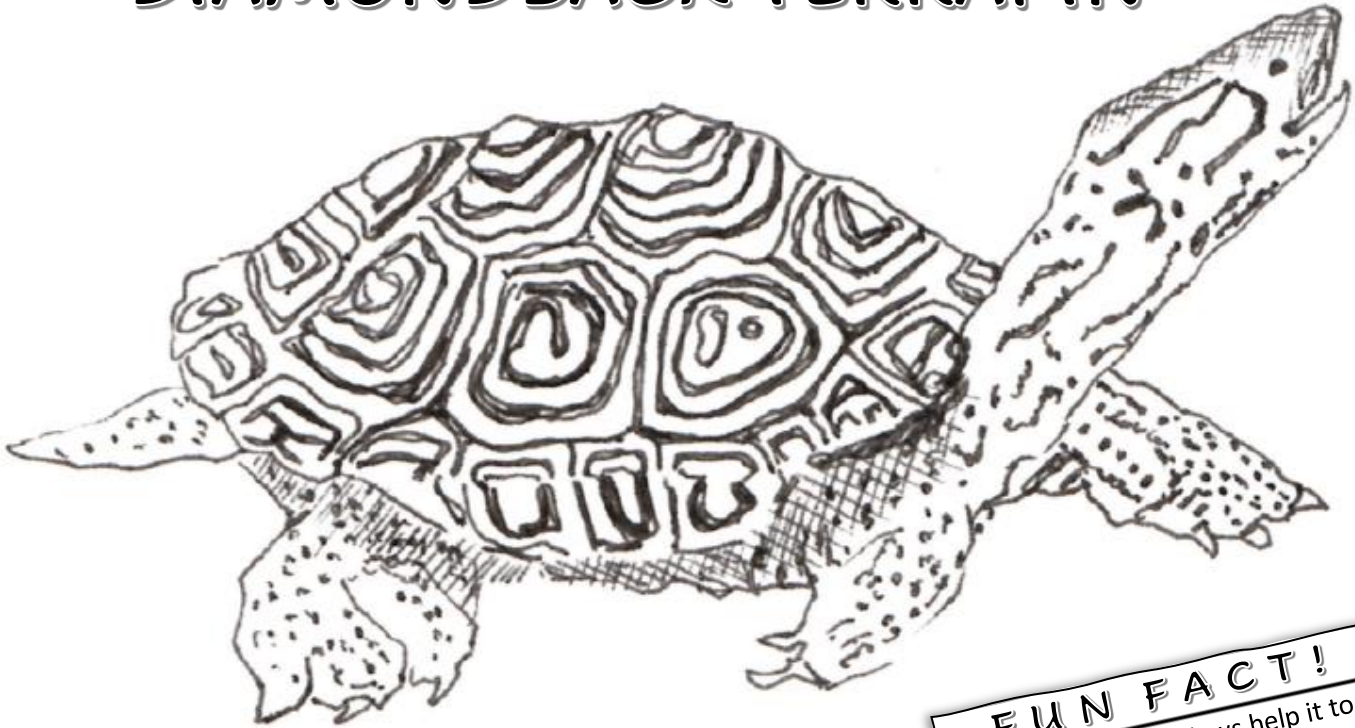

## **FUN FACT!**

A horseshoe crab has 10 eyes that are spread out over its body. Also, horseshoe crabs are not actual crabs but are more closely related to scorpions and spiders.

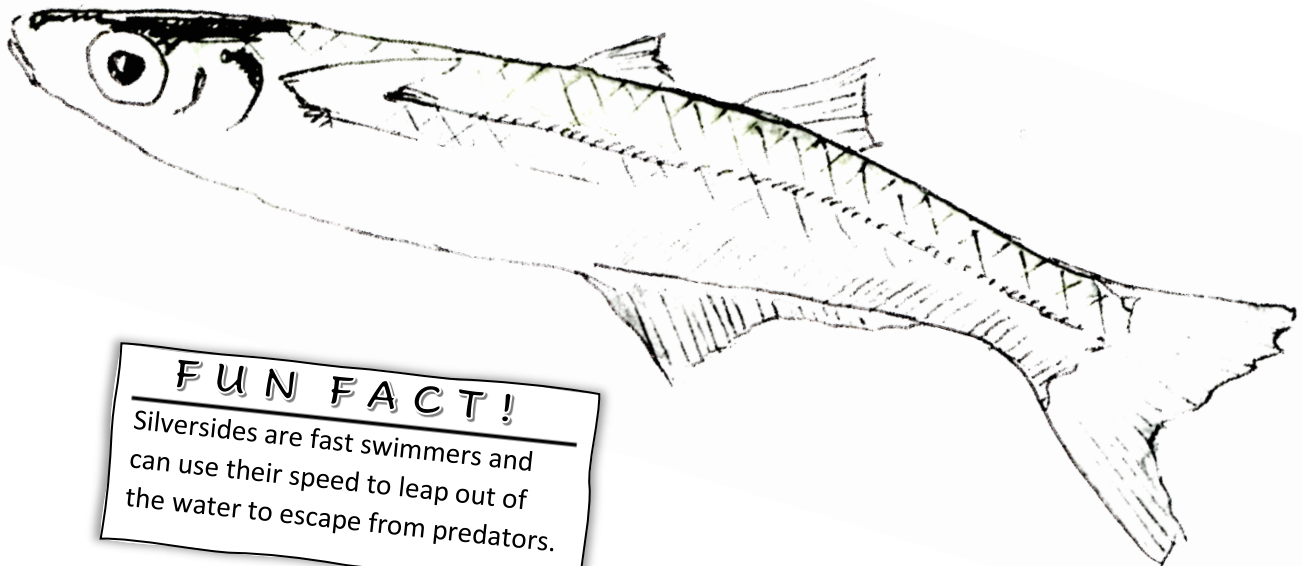

# DIAMONDBACK TERRAPIN

## **FUN FACT!**

A terrapin's strong jaws help it to crush the shells of its prey, like clams and snails.

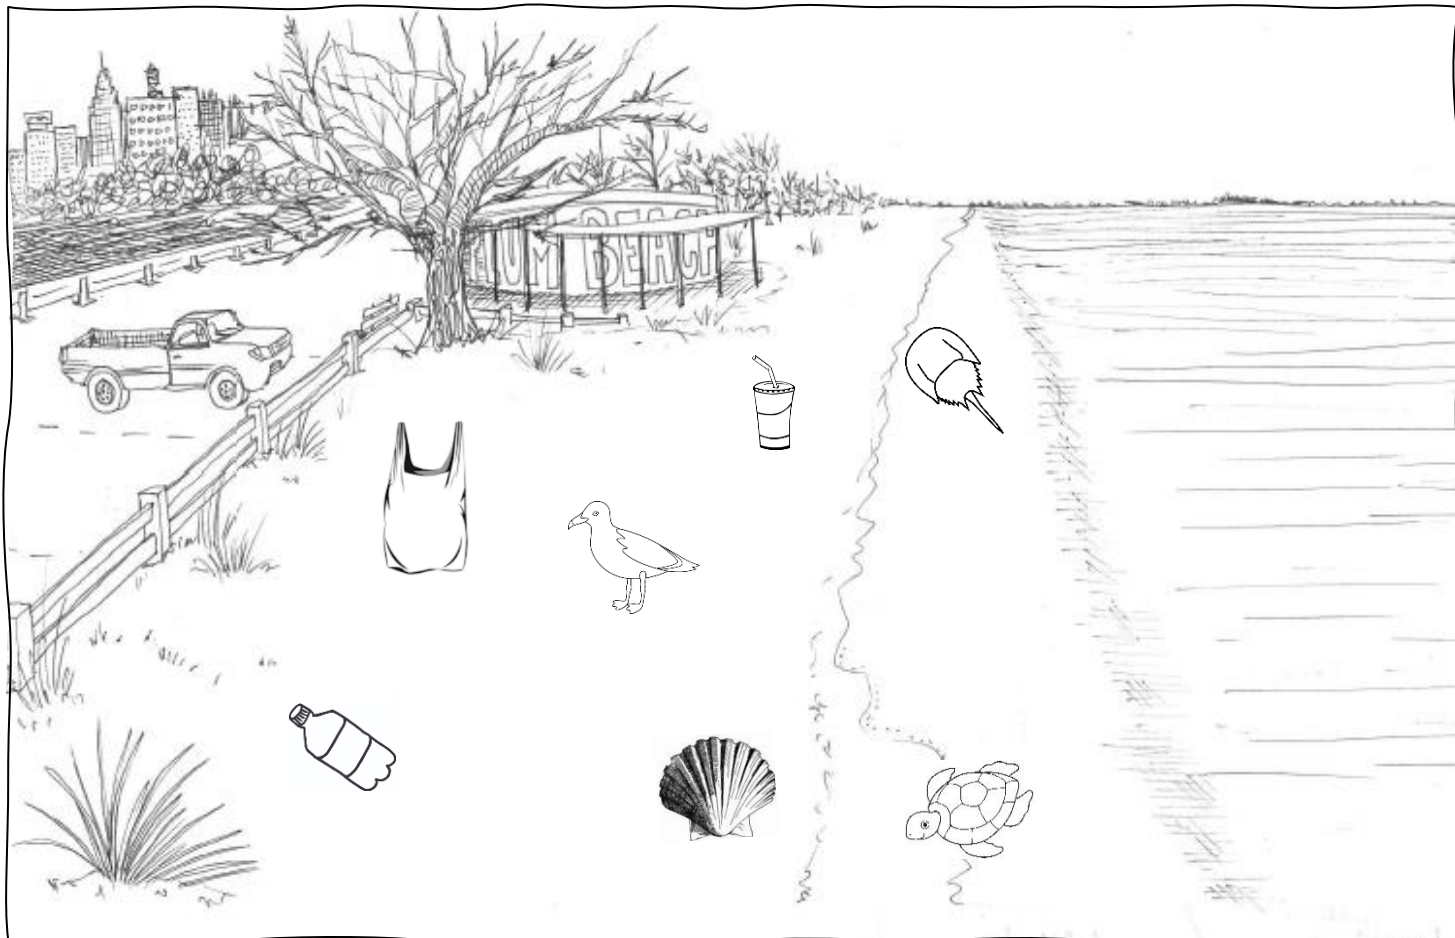

# ATLANTIC SILVERSIDE

## **FUN FACT!**

Silversides are fast swimmers and can use their speed to leap out of the water to escape from predators.

# What does not belong on the beach?

Draw an ~~X~~ through things that should NOT be on the beach

CIRCLE the things belong at the beach

COLOR the WHOLE PAGE!
